📁 PROFESSIONAL SUMMARY

Cloud Engineer with 2+ years of experience across AWS and Azure environments, specializing in production operations, observability, incident response, and CI/CD workflows. AWS Certified Solutions Architect – Professional with hands-on project experience building applied AI solutions using RAG, LLMs, agentic workflows, tool calling, human-in-the-loop controls, and grounded AI systems. Built KnowledgeHub AI and SupportPilot AI, translating practical problems into working AI applications through requirements definition, workflow design, development, testing, troubleshooting, and iterative improvement. Seeking opportunities in Forward Deployed Engineering, Applied AI, and AI Solutions Engineering.

📁 PROFESSIONAL EXPERIENCE

Cloud.In, Cloud Engineer May 2025 – Present | Remote

- Monitor AWS and Azure infrastructure and production workloads using CloudWatch, PagerDuty, and New Relic to maintain availability and reliability.
- Investigate infrastructure and application alerts, perform initial troubleshooting, and coordinate with Level 2 and engineering teams during critical incidents.
- Monitor database availability, backups, ETL cycles, replication, scheduled jobs, logs, and infrastructure performance.
- Support CI/CD, deployments, release monitoring, Jira operational requests, and SQL script execution.
- Collaborate with development and operations teams to improve monitoring processes, incident response, and production reliability.

Cloud.In, Junior Cloud Engineer May 2024 – May 2025 | Remote

- Supported AWS services including EC2, Redshift, SES, and CloudWatch across production environments.
- Monitored infrastructure, applications, logs, alerts, performance metrics, and operational tickets.
- Assisted with incident response, deployment activities, release monitoring, and production operations.

🧠 TECHNICAL SKILLS

Applied AI: RAG, LLM Applications, Agentic AI, Tool Calling, Grounded Generation, Hybrid Retrieval, Vector Search, Human-in-the-Loop Workflows

Development: Python, FastAPI, PostgreSQL, pgvector, Gemini, SQLAlchemy, pytest, Git, GitHub

Cloud & Operations: AWS, Azure, EC2, CloudWatch, Redshift, New Relic, PagerDuty, Jira, Octopus Deploy

📁 AI PROJECTS

KnowledgeHub AI — Multi-User Multimodal RAG Knowledge Platform 📄

Built a document intelligence platform using RAG, Gemini, FastAPI, PostgreSQL, and pgvector. Supports multi-format document ingestion, hybrid retrieval and reranking, grounded Q&A with source traceability, multimodal document understanding, conversational follow-ups, and isolated multi-user knowledge bases.

SupportPilot AI — Agentic Support Investigation & Resolution System 📄

Built an agentic AI support system that performs multi-tool investigations and generates evidence-backed recommendations. Includes human-in-the-loop approvals, controlled action execution, customer isolation, rollback, auditability, post-action verification, and dedicated operational interfaces.

🧩 CERTIFICATIONS

AWS Certified Solutions Architect – Professional (SAP-C02)

AWS Certified Cloud Practitioner (CLF-C02)

🧩 EDUCATION

Bachelor of Technology, Electronics and Communication Engineering 2020 – 2023 | Rajahmundry, India
Godavari Institute Of Engineering And Technology

Diploma, Electronics and Communication Engineering 2017 – 2020 | Bhimavaram, India
D.N.R College of Engineering and Technology

SSC, S.J.S.M.Z.P.P. High School 2016 – 2017 | Mori, India

🌐 LANGUAGES

English | Telugu | Hindi
